PROJECTS

My Portfolio[HTML5, CSS-3, JavaScript] — August 2021
- **Problem:** It was difficult for everyone to find all of my works, experience's or tech-stacks at one place. So I came up with building my portfolio
- **Solution:** Using **HTML-5, CSS-3, ParticleJS, Vanilla JS and JQuery** this app has been built.
- Other than mentioned tech stacks I have been used some other 3rd party API's like **tawk.to** for live chating

JustSpeak[HTML5, CSS3, JS(Node+vanilla), firebase] — dec 2021
- **Problem:** Sometime it becomes difficult to manage different kind of transcript work.
- **Solution:** This web application can help to overcome from these problems and user can send the entire transcript to their email, cross verify long notes, etc
- With the help ALAN-AI voice assistant, disabled person can also use the application.
